DETAILED ACTION

Amendment

1. Receipt is acknowledged of the amendment filed on December 30, 2003. In the
5 amendment claims 1 and 4 were amended. Currently, claims 1-4 remain for examination.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the
basis for the rejections under this section made in this Office action:

10 A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed
in the United States before the invention by the applicant for patent or (2) a patent granted on an application for
patent by another filed in the United States before the invention by the applicant for patent, except that an
15 international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this
subsection of an application filed in the United States only if the international application designated the United
States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-4 are rejected under 35 U.S.C. 102(e) as being anticipated by Wada et al. (US
6,602,734).

20 Wada teaches a method of manufacturing semiconductor device (see abstract) such as
BGA (ball grid array) type device, LGA (land grid array and mini-cards (col. 7, lines 50-56)
comprising steps of providing a base substrate including a plurality of individual substrates
connected together as shown in figures 1 and 2; mounting a semiconductor chips 12 on the
substrate (see figure 8; col. 5, lines 45+); covering the substrate with upper layer 14, 15a (see
25 figures 10 and 11; col. 5, lines 63+); and cutting the substrate producing a plurality of individual
semiconductor pieces 20 (see figure 14; col. 6, lines 34+).

Response to Arguments

4. Applicant's amended claims and remarks filed on December 30, 2003 have been carefully considered. Although Applicant amended claims to further clarify the claimed subject matter, it is the Examiner's opinion that the cited reference to Wada still teaches the subject matter claimed in amended claims.

As shown in figure 2, Wada discloses an array of substrates including a plurality of individual substrates connected together by a plurality of connecting lines. Figure 9 and figure 13 are the horizontal view of the substrate. Therefore, looking at the substrate from above or from side, 1A is an array of substrates including a plurality of individual substrates connected together by one ore more segments.

The amended claims and remarks describing these elements have been fully considered, but they are not persuasive. Accordingly, the Examiner has made this Office Action final.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37

Art Unit: 2876

CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
